

BOCCE DIVISIONING SCORE RECORD SHEET

**Special
Olympics
Leinster**

Each athlete should play three modified games.

1. The pallina is placed at the 30ft line, and the player should play 8 balls. The closest **three** balls to the pallina are measured in centimetres and recorded.
2. The ball is then placed at the 40ft line and the process is repeated with the closest **three** balls measured.
3. The ball is then placed at the 50ft line and the process is repeated a final time.

The pallina must be replaced in its original spot if moved.

The athlete's divisioning score is the total distance of the **nine balls** that were measured.

The score sheets below can be used to record the athletes divisioning results.

Club Name:

Athlete Name: Paddy O'Reilly (Example)

Line	Distance (centimeters)			Total
30 ft	56	78	63	197
40 ft	106	95	120	321
50 ft	85	125	140	350
Total				868
