

# Healthy Eating

# Food Pyramid/Eatwell Guide

- Eating a healthy diet is very important.
- We need to eat the right foods so that our bodies work properly.
- The food pyramid/Eatwell Guide helps show us what foods to eat.

## Food Pyramid

## Eatwell Guide

## Fruit and Vegetables

- The first section of the pyramid/plate is fruit and veg.
- We should eat **5-7 portions** from this section every day.
- A portion looks like: 

## Carbohydrates

- The second section of the pyramid/plate is carbohydrate.
- We should eat **3-5 portions** from this section every day.
- Examples: bread, potatoes, cereal, pasta and rice. 

## Dairy

- ☾ The third section of the pyramid/plate is dairy.
- ☾ We should eat **2-3 portions** from this section every day.
- ☾ Examples: milk, cheese and yogurt.

## Protein

- ☾ The fourth section of the pyramid/plate is protein.
- ☾ We should eat **2-3 portions** from this section every day.
- ☾ Examples: meat, fish, eggs and beans.

## Foods High in Fat, Sugar & Salt

FEW  
PORTIONS

- The last section of the pyramid/plate is the top section.
- We should **limit these foods**.
- Examples: chocolate, crisps, sweets and butter.
- Choose a reduced fat spread instead of butter, and use olive or rapeseed oil in cooking.

## Water

- Although water is not on the pyramid it is very important.
- Our bodies are made up more than half with water.
- We lose water when we sweat and go to the toilet.
- We must drink plenty of water to keep our body healthy.
- Try to drink **8 glasses or 4 bottles** of water every day.

# Healthy Takeouts

- Choose thin crust pizzas and add extra vegetables.

- Choose plain boiled rice instead of fried rice.

- Avoid battered dishes like sweet and sour and choose a stir fry instead.

# Top Tips for a Healthy Diet

- Choose the low fat option for dairy foods.

- Choose wholemeal breads, pasta, rice and cereal.

- Trim all fat off meat.

- Don't add salt at the table.

- Enjoy fresh fruit and yogurt for a healthy dessert.

- Never skip meals.
